

MIDAS # 3258
HUNT POND
FRYEBURG, OXFORD CO., ME.
AREA 25 ACRES

HUNT POND

Fryeburg Twp., Oxford Co.
U.S.G.S. Fryeburg, ME-NH (7.5')

Fishes

Yellow perch
Chain pickerel

Hornpout (bullhead)
Pumpkinseed sunfish

Physical Characteristics

Area - 25 acres

Maximum depth - 10 feet

Temperatures:

Surface - 78°F

10 feet - 76°F

Principal fisheries: Chain pickerel

Hunt Pond is a small, picturesque, weedy pond located along the Maine and New Hampshire border. Late summer water quality is excellent for resident warm water fisheries. However, the pond does not thermally stratify in the summer to provide an area of cold water suitable for trout. The presence of competing and predatory warmwater fish further limits opportunities to manage for trout. Hunt Pond is best managed for warm water fish.

Angler access is restricted to permissive trespass and there is a need to acquire public access to this pond.

Surveyed – August 1974
